Association of Nigeria, Volume 47
Number 1, December, 2020

Submission of the paper

Authors are requested to visit www.man-nigeria.org.ng to submit manuscripts in Microsoft word and make payment accordingly.

Preparation of the manuscript

General: The manuscripts should be in English and typed with single column and single line spacing on single side of A4 paper. The first page of an article should contain;

- (1) a title of paper which well reflects the contents of the paper (Arial, 12pt),
- (2) all the name(s) and affiliations(s) of authors(s) (Arial, 12pt),
- (3) an abstract of 100-250 words (Times New Roman, 11 pt),
- (4) 3-5 keywords following the abstract, and
- (5) footnote (personal title and email address of the corresponding author). The paper should be concluded by proper conclusions which reflect the findings in the paper. The normal length of the paper should be between 10 to 15 journal pages.

Tables and figures: Tables and figures should be consecutively numbered and have short titles. They should be referred to in the text as following examples (e.g., Fig. 1(a), Figs. 1 and 2, Figs. 1(a)-(d) / Table 1, Tables 1-2, etc). Tables should have borders (1/2pt plane line) with the captions right before the table. Figures should be properly located in the text as an editable image file (.jpg) with captions on the lower cell.

Units and Mathematical Expressions: It is desirable that units of measurements and abbreviations should follow the System International (SI) except where the other unit system is more suitable. The numbers identifying the displayed mathematical expression should be placed in the parentheses and referred in the text as following examples (e.g., Eq. (1), Eqs. (1)-(2)). Mathematical expressions must be inserted as an object (set as Microsoft Equations 3.0) for Microsoft Word 2007 and later versions. Image-copied text or equations are not acceptable unless they are editable. The raised and lowered fonts cannot be used for superscription and subscription.

References: A list of references which reflect the current edition of APA format, to locate after conclusion of the paper.

Review

All the submitted papers will undergo a peer-review process, and those papers positively recommended by at least two expert reviewers will be finally accepted for publication in the Abacus Journals or after any required modifications are made and a payment of ₦15,000.00 as publication fee. The normal length of the paper should be between 8 to 12 pages. Any extra page will attract additional charges at the rate of ₦500.00 per page.

Copyright

Submission of an article to Abacus Journal implies that it presents the original and unpublished work, and not under consideration for publication elsewhere. On acceptance of the submitted manuscript, it is implied that the copyright thereof is transferred to the Abacus. The Transfer of Copyright Agreement may also be submitted.

Prof. Usman, Kamoru Olayiwola

TABLE OF CONTENTS

1. Chebyshev Polynomial Technique for Optimizing Stock Allocation
Chikwendu, C.R. and Emenonye, C.E
2. Application of Homotopy Perturbation Method to Heat Transfer in Nanofluid
J. I. Oshinire, B. I. Olayiwon and O. A. Adeokun
3. Topp-Leone Linley Distribution
Nze, L. C. and Ekhoasuchi, N.
4. On Mathematical Model for Zika Virus Disease Control With Wolbachia-Infection
Michael C. Anyanwu, Godwin C. Mbah and Emmanuel C. Duru
5. Dynamics of Viral Marketing on Networks
O. Abund and P.N. Okolo
6. The Volume of a Rectangular Frustum: An Alternative Method
Olagunju Samuel Olu, Ph.D
7. The Reverse Order Relationship Between the Skew-Symmetric Game and Linear Programming Problem
Okafor, Folakemi M. Adiri, Emmanuel Iyasere
8. Steady State Solution of Magnetohydrodynamics (MHD) Free Convection Heat and Mass Transfer in an Annulus With Convective Boundary Conditions of Mixed Kind
Isah Bala Yabo and Muhammad Murtala Hamza
9. One Step Hybrid Block Method for the Solution of First Order Initial Value Problems of Ordinary Differential Equations
Yunusa, S., Mohammed, G.A., Etuk, E.D., Iyiu, Y.A. and Garba, U.
10. On the Identity Graph of Symmetric Group of Degree Four (S₄)
Aminu Muhammad Lawan (Ph.D)
11. On the Application of Power Series Method to the Solution of a Second Order Autonomous and Non-Autonomous Airy's Differential Equations
E.O. Eze, B.O. Osu and U.E. Obasi
12. Approximate Series Solution of Ebola Virus Disease Model Using Homotopy Analysis Method
Chinwendu E. Madubueze and Remigius Okeke Aja
13. Mathematical Modelling of Agro-Chemicals Residue in Rice Production
G.O. Agaba, C.A. Ada, B. Rahman and O.E. Ado

14. Field Equation Interior to a Homogeneous Static Spherical Mass Distribution
M.U. Sarki, A.A. Gundu, and Shehu, B. 150
15. On the Existence and Uniqueness of 2π -Periodic Solutions of Duffing's Equation
Using Abstract Implicit Function Theorem in Banach Spaces
E.O. Ezel and C.O.D. Udaya 156
16. Effects of Variable Viscosity and Viscous Dissipation on Free Convective Couette
Flow in a Vertical Channel: The Homotopy Perturbation Method Approach
Tafida M. Kabir, Abiodun O. Ajibade and Mu'awiya H. Usman 161
17. Steady Natural Convection MHD Flow in a Vertical Channel With Induced
Magnetic Field and Variable Fluid Properties
Abiodun O. Ajibade and Shehu A. Bolaji 176
18. Isomorphism of Normal Closure of Subset of Order k ($k \leq K$) in a
Finite Group
Uchenna Emmanuel Obasi and Remigius Okeke Aja 193
19. Modeling a Lifetime Process With Gompertz Exponential Distribution: Properties
and Application
Ogbo, J. O., Eghwerido, J. T. and Efe-Eyefia, E. 199
20. Transportation Optimization Model for Cement Distribution
Daniel, E. E. and P.O. Agada (Ph.D) 212
21. Out-of-Plane Equilibria in the Elliptic Restricted Three-Body Problem With
Equal Oblate Primaries and a Luminous Primary Body
Aguda Ekele Vincent and Joel John Taura 226
22. On The Training of Recurrent Neural Networks Model
Hamzah Abubakari, Sagir Abdu Masanawa and Surajo Yusuf 241
23. Predictions and Detections of Chaotic Behaviour in Single and Double Well Duffing Oscillator
Under Certain Parametric Variations and Excitations
*Everestus Obinwanne Eze, Uchenna Emmanuel Obasi, Godwin Ezugorie
and Ujumadu Rosary Ngozi* 254
24. (γ) -Convergence Analysis and Variational Approximation Algorithm
for Noise Minimization During Image Processing
D. I. Lanlege, A.I. Ma'ali and K. Bitrus 274
25. Competition as Major Causative Factor of Population Dynamics: A Case Study
of Aphids, Thrips and Whiteflies In Solanaceous Vegetable Plants
S. Musa, A. O. Adesanya and T. A. Shamaki 292

26.	Prediction of Banks Stock Performance in Nigeria Stock Exchange Market: An Application of Logistic Regression Model <i>C. L. Ani, U. M. Hassan and M. I. Maiwando</i>	300
27.	On the Derivation and Implementation of a Four-Stage Harmonic Runge-Kutta Scheme for Solving Initial Value Problems in Ordinary Differential Equations <i>Ehiemua M. E., Agbehoh G. U. and Ataman J. O.</i>	311
28.	Resolving the Choice of a Life Partner Using Fuzzy Logic <i>Onyekomwu, A. C.</i>	319
29.	Arima Modeling and Forecasting of Consumer Price Index (CPI) in Nigeria <i>Anas Ibrahim and Sam Olu Olagunju</i>	323
30.	Mathematical Modeling of the Technology of Leather Fatliquoring <i>Galadima, D. J., Okon, U. E., Jekada, J. Z. and Isuwa, A.</i>	335
31.	A Simple Model on the Transmission Dynamics of Hepatitis B Virus Infection <i>Usaini and U. M. Abubakar</i>	341
32.	Comparative Study of Two Data Reduction Techniques in Principal Component Analysis Using Both Real and Simulated Data <i>Haruna Suleiman, Yusuf Muhammad Kufena and Lukman Lawal</i>	352
33.	Application of the Shifted Legendre Polynomials of Three Step Hybrid Block Method for the Solution of First Order Initial Value Problems of Ordinary Differential Equations <i>Yunusa, S., Mohammed, G. A., Pantuvo. T. P. and Etuk, E. D.</i>	365
34.	Out-of-Plane Equilibria in the Equilateral Restricted Four-Body Problem With Radiation Pressure and Angular Velocity Variation <i>Vincent E. Aguda, AbdulRaheem AbdulRazaq, and Amuda O. Tajudeen</i>	372
35.	A Deterministic Mathematical Model in Understanding Drug-Abuse Related Crimes in Contemporary Society for Prevention <i>Mohammed Olanrewaju Ibrahim, Ganiyu Kahir Adewale, Adejinmi Olusoji Joshua, Akande Kazeem Babatunde, Momoh Hafizat Ozichu, 6Abdulkadir Olaitan Halimat</i>	383
36.	Extended Two Point Super Class of Block Backward Differentiation Formula for Solving First Order Stiff Initial Value Problems <i>Hamisu Musa, Zainab Ibrahim Labaran, Zarina Bibi Ibrahim, and Ibrahim Lawal Kane</i>	395
37.	Fuzzy Subgroups for (the Cartesian Product of) The Abelian Structure: $\mathbb{Z}_{16} \times \mathbb{Z}_{2^n}, n > 3$ <i>S. A. Adebisi, M. Ogiugo² and M. Enioluwafe</i>	408
